

SIGNALING SYSTEMS FOR PUBLIC TRANSPORT

A long-exposure photograph of a city street at night. In the foreground, a tram moves from left to right, leaving behind long, bright white and yellow light trails. The street is paved with cobblestones. In the background, a large, illuminated cathedral with multiple spires sits atop a hill. Streetlights line the road, creating starburst effects. A traffic sign on the right indicates a straight-ahead lane for buses. The sky is a deep blue.

FULL-AUTOMATIC & SEMI-AUTOMATIC DEPOT CONTROL SYSTEM
